Business Process Mapping using the BPMN Modelling Notation Introduction Course - 1 Day

This BPMN training course teaches the use of the Business Process Modelling Notation v2.0 for business process analysis, mapping and modelling within the context of a business process management (BPM), improvement or re-engineering strategy. Industry best practice is taught for business process modelling at every level of abstraction. The models produced can be traced through to the requirements for any kind of computer system. Each technique is taught to the level required for competence on a real project. Understanding is tested with exercises based on a real-world project example either using Sparx Systems Enterprise Architect, another suitable BPMN modelling tool or on paper.

Delegates will learn:

- The basics and the necessary detail of the Business Process Modelling Notation (BPMN)
- How to map business process flow on Business Process Diagrams (BPDs) using events, activities, gateways, flows, pools and lanes
- How to map private, public and collaboration processes
- How to structure the business process model using collaboration, hierarchy and concurrency
- How to map primitive process steps and business rules
- How to integrate business mapping techniques into a conventional approach to project documentation

Suitable For:

Business Consultants, Business Analysts, Business Process Engineers, Requirements Gatherers, System Analysts and Project Managers with at least 2 years experience. This course is not suitable for those seeking certification as a step towards a qualification. See the Certification Policy for a detailed discussion.

Course Logistics:

Course attendance is normally limited to 12 students. Courses start at 9.30am on the first day, 9.00am on subsequent days and finish at 5.00pm each day. Students normally use a computer for the exercises, but these can be performed on paper if required. For a discussion on using a BPMN/UML modelling tool please see Modelling Tool Use on Courses. Printed course manuals for each student with copies of all presentations, exercises and solutions are provided.

On-Site (In-House) Courses:

The client is expected to provide an appropriate venue, refreshments, XGA/WXGA projector and screen, whiteboard or flipchart and at least one computer per two students loaded with a suitable BPMN/UML modelling tool, unless exercises are to be performed on paper. For a full discussion of on-site course issues please see On-Site Course Logistics.

Scheduled Public Courses:

CRaG Systems no longer provide scheduled public training. However, we continue to provide on-site (in-house) training for any number of students with special discounts for small classes. You will find our pricing competitive with most public courses for just 2 or 3 students. Please use the On-Site Course Pricing page to get a firm, downloadable quotation for on-site training.

Pricing:

On-site (in-house) course pricing is available from the On-Site Course Price Calculator page. For consultancy pricing please see the On-Site Consultancy Price Calculator.

Training Course Outline

Introduction

Logistics - People - Modelling - The Business Process Modelling Notation (BPMN) - An Incremental Process for Modelling

Mapping Process Flow

Business Process Diagrams (BPD) - Private Processes - Start and End Events - Activities - Sequence Flows - Exclusive Gateways - Intermediate Events - Public Processes - Pools and Lanes - Message Flows

Mapping Process Flow Workshop

Mapping Collaboration, Hierarchy and Concurrency

Collaboration Processes - Hierarchy using Sub-Processes and Call Activities - Concurrency with Parallel Gateways - Modelling Process Steps as Tasks - Choosing a Consistent Level of Abstraction

Collaboration, Hierarchy and Concurrency Workshop

Should the content of the available BPMN or BPMN/UML courses not fit your exact requirements, then CRaG Systems can create a custom course for you. Please either email or call us to discuss your particular needs.
