UML Training Courses and Workshops

CRaG Systems UML training courses and workshops are provided on-site (in-house) at your premises. Each UML course or workshop teaches the skills required to use the Unified Modelling Language within one or more stages of a well defined model-driven software development process. UML courses and workshops provides extensive training in the UML v2.5 notation either for the whole team or for each specific role (see table below).

In addition to, or instead of, formal classroom training, a UML with Enterprise Architect KickStart Model Development Workshop can get your project off to a flying start by teaching your team hands-on how to develop and maintain a UML model of their own systems in an incremental and iterative development environment. Alternatively CRaG Systems can develop a custom UML course or workshop for you to suit your particular needs. Whichever form you choose, students spend a significant amount of time creating multi-dimensional, traceable models of real systems as part of the training using either Sparx Systems Enterprise Architect, another UML modelling tool or on paper.

Each of these training courses and workshops is provided as an On-Site (In-House) Course. Each course or workshop also involves the use of Sparx Systems Enterprise Architect, another modelling tool or paper for exercises and/or model development.

UML Training Courses		
Requirements Definition	**System Analysis**	**Architecture & Design**
System Requirements Definition Using Use Cases - 1 Day	System Analysis Using UML - 2 Days	System Architecture and Design Using UML* - 2 Days
System Requirements Definition and System Analysis Using Use Cases and UML - 3 Days		
System Analysis, Architecture and Design Using UML - 5 Days		
UML for Solution Architects - 3 Days		
UML For Test Development - 2 Days		
Agile UML Project Management - 2 Days		

* A pre-requisite for the 2 day System Architecture and Design Using UML training course is that students are competent in all the modelling taught in the 2 day System Analysis Using UML course

UML Overviews, Introductions and Workshops

UML with Enterprise Architect KickStart Model Development Workshop - N Days

Management Overview - Improving the Quality and Flexibility of Software Development using UML - 1 Day

An Introduction to UML Modelling Techniques - 1 Day

An Introduction to UML with Enterprise Architect Workshop Course - 2 Days

Should the content of the available UML training courses not fit your exact requirements, then CRaG Systems can create a custom course for you. Please either email or call us to discuss your particular needs.
